

May AIBD Events

The American Institute of Building Design

In Collaboration with the

Institute of Classical Architecture & Classical America

And Period Style Homes

Present the:

Winter Park House Styles Program

June 20 - 21st, 2008

Featuring

Florida's Mediterranean Revival

&

The Architecture of James Gamble Rogers II

This two day event will commence with a series of lectures by the Institute of Classical Architecture and Classical America's affiliated practitioners and experts in the fields of classical architecture, local history and regional vernacular styles. Events will also include guided tours of historic and contemporary sites providing participants with opportunities to observe how the elements and principles of classical architecture evolved and became the regional styles we see today.

Additional instruction and discussions will focus on developing strategies for adapting historical styles to contemporary design problems.

Come one come all to the;

AIBD Florida Society's Sixth Annual Concept Awards, Design Competition

The Southeast Builders Conference this summer will be held in Orlando on July 30 through August 2. The AIBD Florida Society has sponsored a live design Competition there for the past five years. This year, our sixth, needs contestants. The competition, The Concept Awards, is part of the SEBC Aurora Awards. At stake are the last three Aurora Awards to be secured. You can have one of these if you place in the contest. A Grand Aurora, is first prize, 2nd and 3rd place receive Auroras as well. This is a live design contest on the exhibit hall floor. You will have passes to roam the aisles and see all the displays. Apply online or download the application at <http://www.theauroras.com/>. Use the "steps to enter" link on the left-hand menu. The fee to enter is \$100. The competition in Thursday and Friday, judging is Saturday. Contestants will be notified to attend the Saturday night black tie banquet gala for award presentation. Simpson Strong-tie Class Jacksonville Nov 15th

I have been working with Ron Gaines of Simpson Strong-tie and have recently received the approval from Simpson to sponsor AIBD members for a Introduction to High wind Design & Construction class to be taught at the Simpson facility in Jacksonville on November 15th. Simpson has agreed to pay for our hotel rooms and meals during the event. Ron will address the membership this weekend and will provide more information regarding registration etc. Our members will be required to hold their hotel rooms with a credit card but Simpson will pay for the rooms. The member's credit card simply holds the room in case someone backs out. Below is a brief description of the class.

Introduction to High wind Design & Construction

This workshop is designed especially for engineers, architects, specifiers, building officials, and builders interested in high wind resistant construction. Detailed information will be presented on Strong-Tie products for high wind resistant construction. Special attention is given to the changing building codes and insurance issues. The "continuous load path" concept will be covered in detail, with highlights on uplift, lateral, and overturn resistant products. We will also review innovative new products such as connectors for light gauge steel construction and Simpson Anchor Systems. This course focuses on Strong-Tie products and field applications.

Sincerely,

Kathryn D. Murphy

AIBD Florida Executive Director
